

World Geography

Books Content- With Page Numbers

Part No	Topic	Page Index
1	Foundations and Physical Geography	6
2	Climatology and Oceanography	91
3	Biogeography and Environmental Geography	171
4	Human Geography and Economic Geography	245
5	Models, Theories and Regional Geography	361
	Total Pages (including Questions)	500 + Pages

Test Questions after every part with explanations

Part	Topic	No Of Questions
1	Foundations and Physical Geography	20
2	Climatology and Oceanography	20
3	Biogeography and Environmental Geography	20
4	Human Geography and Economic Geography	20
5	Models, Theories and Regional Geography	20
	Total Test Questions	100

1. World Geography

Part	Chapter	Chapter Title
Part I: Foundations and Physical Geography	1	Introduction to Geography and Earth's Origin
	2	Solar System and Earth-Sun Relationships
	3	Earth's Layered Structure and Geomagnetism
	4	Latitude, Longitude, Time Zones and Map Reading
	5	Earth's Movements - Rotation, Revolution and Effects
	6	Seasons, Eclipses and Practical Geography
	7	Earth's Interior - Crust, Mantle, Core
	8	Sources of Information about Earth's Interior
	9	Geology and Rock Systems - Minerals and Rocks
	10	Three Families of Rocks - Igneous, Sedimentary, Metamorphic
	11	Geomorphic Processes - Endogenic and Exogenic Forces
	12	Earthquakes and Tsunamis - Types, Effects, Distribution
	13	Volcanism - Types, Landforms, Distribution
	14	Continental Drift Theory, Plate Tectonics and Geosynclines
	15	Sea Floor Spreading, Isostasy and Mountain Building
	16	Landform Evolution by Running Water and Channel Morphology
	17	Landform Evolution by Groundwater (Karst Topography)
	18	Landform Evolution by Glaciers
	19	Landform Evolution by Winds
	20	Landform Evolution by Waves and Currents
	21	Weathering Processes, Mass Movements and Slope Development
	22	Geomorphic Cycles, Denudation Chronology and Erosion Surfaces
	23	Applied Geomorphology and Economic Geology
Part II: Climatology and Oceanography	24	Atmosphere - Composition and Structure
	25	Temperature and Pressure Belts of the World
	26	Insolation and Heat Budget of Earth
	27	Atmospheric Circulation and Stability
	28	Planetary and Local Winds, Monsoons and Jet Streams

	29	Air Masses, Fronts, Cyclones (Temperate and Tropical)
	30	Precipitation - Types and Distribution
	31	Weather and Climate Systems
	32	Köppen's, Thornthwaite's and Trewartha's Climate Classification
	33	Major Climatic Zones and Regional Climate Systems
	34	Hydrological Cycle and Global Climatic Change
	35	Applied Climatology and Urban Climate
	36	Ocean Relief Features and Submarine Topography
	37	Ocean Temperature, Salinity and Heat-Salt Budgets
	38	Ocean Currents, Waves and Tides
	39	Marine Resources and Ocean Deposits
	40	Coral Reefs, Marine Ecosystems and Sea-level Changes
	41	Law of the Sea and Marine Pollution
Part III: Biogeography and Environmental Geography	42	Soil Genesis, Classification and Distribution
	43	Soil Profile, Erosion, Degradation and Conservation
	44	Factors Influencing World Distribution of Plants and Animals
	45	Natural Vegetation Types and Major Biomes
	46	Forests - Types, Significance and Conservation
	47	Deforestation, Conservation Measures and Social Forestry
	48	Agro-forestry, Wildlife and Major Gene Pool Centres
	49	Principle Ecology and Human Ecological Adaptations
	50	Influence of Man on Ecology and Environment
	51	Global and Regional Ecological Changes and Imbalances
	52	Ecosystem Management and Conservation
	53	Environmental Degradation, Management and Conservation
	54	Biodiversity and Sustainable Development
	55	Environmental Policy, Hazards and Remedial Measures
	56	Environmental Education and Legislation
Part IV: Human Geography and Economic Geography	57	Perspectives in Human Geography - Areal Differentiation
	58	Regional Synthesis, Dichotomy and Dualism

	59	Environmentalism and Quantitative Revolution
	60	Radical, Behavioural, Human and Welfare Approaches
	61	Languages, Religions, Secularisation and Cultural Regions
	62	Human Development Index and Quality of Life
	63	World Economic Development - Measurement and Problems
	64	World Resources and Their Distribution
	65	Energy Crisis and Limits to Growth
	66	World Agriculture - Typology of Agricultural Regions
	67	Agricultural Inputs, Productivity and Food Security
	68	Food and Nutrition Problems, Famine Causes and Remedies
	69	World Industries - Location Patterns and Problems
	70	Patterns of World Trade
	71	Growth and Distribution of World Population
	72	Demographic Attributes and Population Theories
	73	Migration - Causes and Consequences
	74	Over-under-optimum Population Concepts and Policies
	75	Population as Social Capital and Social Well-being
	76	Types and Patterns of Rural Settlements
	77	Environmental Issues in Rural Settlements
	78	Hierarchy of Urban Settlements and Urban Morphology
	79	Primate City, Rank-size Rule and Functional Classification
	80	Sphere of Urban Influence and Rural-urban Fringe
	81	Satellite Towns, Problems and Sustainable Development of Cities
Part V: Models, Theories and Regional Geography	82	System Analysis in Human Geography
	83	Malthusian, Marxian and Demographic Transition Models
	84	Central Place Theories of Christaller and Losch
	85	Perroux and Boudeville Growth Pole Theory
	86	Von Thunen's and Weber's Location Models
	87	Rostow's Model and Heartland-Rimland Theories
	88	Laws of International Boundaries and Frontiers

	89	Regional Planning - Concepts, Methods and Development Strategies
	90	Asia - East Asia, Southeast Asia, South Asia
	91	West Asia, Central Asia and Regional Integration
	92	Europe - Physical, Economic and Integration
	93	North America, Mexico and Central America
	94	South America and Brazil
	95	Africa, Australia and Oceania
